

Detectable Aburnet KleenCap Hair Cover | PE0413

Product Description

The KleenCap Detectable Hair Cover, featuring 'HairBarrier' technology offers two times better hair containment than a standard mobcap, and six times better hair containment when worn in combination

with a HiCare Hairnet. The KleenCap features an ultra-fine, multi-layered mesh barrier, keeping hairs inside the barrier and away from the products being processed.

Detectable KleenCap Hair Cover Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Highly visible colour for easy visual identifications
- ✓ Significantly reduces foreign body hair contamination
- ✓ Two integral metal detectable closures reduces the risk of the product becoming a foreign body contaminant
- ✓ Manufactured entirely from Polyester Elastane, with the addition of two stainless steel grips
- ✓ Conforms to REACH Standards
- ✓ Contains StayCool and Anti-Microbial technology
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Product Code	PE0413	Material	Polyester Elastane
Pack Size	25	Grip Material	Stainless Steel
Pack Weight	0.20kg	Detectability	Part Metal Detectable
Colour	Blue	Country Of Origin	Britain
Dimensions	Stretch To Fit	Commodity Code	65050090

Materials

Manufactured entirely from 57gsm Polyester Elastane, with the addition of two 5mm stainless steel grips, it also conforms to REACH standards. Dry fastness - 4/5 grey scale C06A2S.

These products are not designed to come in to direct contact with food and therefore do not come with any food contact approvals or certifications. They are to be used as personal protection to reduce the risk of hair contamination.

Safety Certificates / Approvals

REACH Compliant BRCGS Compliant Made In Britain ISO 9001:2015

Metal Detectability

The KleenCap Detectable Hair Cover contains two 5mm Stainless Steel grips, which can be detected by correctly calibrated metal detection systems. The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable.
