

Fish 200 Safety Knife | SKF200B*

Fish 200 Safety Knife

The Fish 200 is a fully metal detectable, reusable safety knife. The large stainless steel blade is fully concealed for utmost operator safety, this blade is ideally suited for cutting packaging paper, shrink wrap and plastic strapping. The optional rear hook blade is also made from stainless steel and is designed for cutting through packaging tape, string netting and

cardboard. The knife features a simple two screw blade change facility.

The body of the Fish 200 is made from blue metal detectable nylon, the hook cover is made from metal detectable polypropylene. There is also an optional tape cutter model instead of the hook blade version. Replacement blades are available to order from BST.

Fish 200 Knife Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Visible blue colour for easy visual identification
- ✓ Multi-functional knife ideal for strapping, banding, stretch wrap, cable ties, rope, string and netting
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Moulded in tough glass filled nylon
- ✓ Features a lanyard point
- ✓ Textured surface for firm grip
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Fish 200 With Hook	SKF200B-H	Blade(s)	Straight & Hook Blades
Fish With Tape Cutter	SKF200B-TC	Blade(s)	Straight & Tape Cutter
Fish W/Out Hook	SKF200B-NH	Blade(s)	Straight Blade
Pack Size	10	Screw	Brass
Pack Weight	0.40kg	Casing Material	Nylon
Colour	Blue	Detectability	Metal Detectable
Dimensions	165 x 40 x 10mm	Country Of Origin	Britain
Accessories	Replacement Blades	Commodity Code	82119300

Replacement Blade Packaging Information

Main Straight Blade	BLF2-SS	Material	Stainless Steel
Tape Blade	BLF2-TCS	Material	Stainless Steel
Hook Blade	BLF2-HC	Material	Carbon Steel
Pack Size	10	Country Of Origin	Britain
Colour	Silver	Commodity Code	82119400

Safety Certificates / Approvals

BRCGS Compliant	Made In Britain	ISO 9001:2015
-----------------	-----------------	---------------

Blade Change Information

Remove locking screws with a screwdriver, insert the screwdriver at corner to separate the two halves of the knife. Carefully reverse or replace blade(s). Snap the two halves back together ensuring there are no gaps. Replace and tighten the screws and replace the hook cover.

Metal Detectability

The Fish 200 safety knives are moulded from an electromagnetically detectable plastic compound. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

Orientation is a highly influential factor for the metal detectability of a contaminant that is non spherical, i.e. it will be easier to detect the contaminant when passing in one orientation compared to another - this is known as the orientation effect.

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
