

## Detectable Silicone Glasses Cord | BSTGC\*

### Product Description

A lightweight and comfortable push-on silicone cord for your spectacles. This circular cord will ensure your eyeglasses are held safely around your neck.

These fully metal detectable silicone glasses cords are manufactured using soft, flexible, silicone rubber containing an evenly dispersed metal detectable

additive with a stainless still clip. The cord is flexible and will push on to most spectacles with ease, once on you can secure with the adjustable metal spring on the adjustable version.

Approximately 17N of force is required to snap the cord. Please note we recommend customers carry out their own testing and risk assessments.

### Detectable Silicone Glasses Cord Advantages

- ✓ Detectable by in-line metal detection systems
- ✓ Highly visible colour for easy visual identification
- ✓ Adjustable and non-adjustable versions available
- ✓ Manufactured from medical grade latex free silicone
- ✓ Displays due diligence in the prevention of foreign body contamination

### Product and Packaging Information

Adjustable Cord	BSTGCA	Non-Adjustable Cord	BSTGCNA
Pack Weight	0.01kg	Break Force	Approx. 17N
Pack Size	5	Material	Silicone
Colour(s)	Blue	Detectability	Metal Detectable
Cord Length	710mm	Country Of Origin	China
Temperature Range	-60°C ~ 200°C	Commodity Code	40070000

## Safety Certificates / Approvals

---

BRCGS Compliant

SO 9001:2015

---

## Fitting Instructions

---

Grasp the stem of the cord and push onto the arm of the glasses until a secure, comfortable position is obtained.

## Metal Detectability

---

The BST Detectable Glasses Cords are manufactured from metal detectable silicone rubber, with an added stainless steel clip which can be detected by correctly calibrated metal detection systems. The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable. This information is intended as a guide for your use of our products, the use of which is entirely at your own discretion and risk.
