

## Secunorm Handy Safety Knife | HANDY

---

### Secunorm Handy Safety Knife

---

Don't be deceived by the compactness of this cutter. The Secunorm Handy Knife might be small, but it surely can cut. It's a cutting tool with bite! This is an ideal cutting tool for the food or pharmaceutical industry, all plastic parts are made from metal detectable plastic. Coupled with a stainless steel blade, there are no risks with the Secunorm Handy Knife. The automated blade retraction of the Handy Knife guarantees a very high degree of safety from

cut injuries. As soon as you've started the cut remove your thumb from the slider. The blade will then withdraw back into the handle immediately after leaving the material being cut.

This ambidextrous Handy Knife has a slider on both sides so anyone can work with it! The 4 cutting edge blade gives you quadruple the usage time, by turning the blade around and turning it over you have four sharp cutting edges.

### Secunorm Handy Knife Advantages

---

- ✓ Detectable by in-line metal detection systems
- ✓ Multi-functional knife ideal for cardboard, wrapping, stretch, tape, shrink wrap, foil, textile, yarn and cord
- ✓ Simple, lightweight and robust with an ambidextrous design
- ✓ Long lasting, replacement stainless steel blades available
- ✓ Can be used for a variety of applications within hygiene critical processing environments
- ✓ Features an automatic blade retraction ensuring a very high degree of safety from cut injuries
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Product Code	HANDY	Dimensions	100 x 7.8 x 22.5mm
Pack Size	1	Cutting Depth	8.5mm
Weight	0.04kg	Detectability	Metal Detectable
Colour	Blue / Silver	Country Of Origin	Germany
Accessories	Replacement Blades	Commodity Code	82119300

Replacement Blade Packaging Information

Replacement Blade	BLHANDY	Material	Stainless Steel
Pack Size	1	Commodity Code	82119400

Safety Certificates / Approvals

GS Certified: 60033010	TUV Rheinland Certified	BRCGS Compliant	ISO 9001:2015
------------------------	-------------------------	-----------------	---------------

## Blade Change Information

---

Simply pull the plastic part out of the handle's end. Don't pull the insert while holding onto the slider. Open up the blade cover. Reverse or replace the blade, make sure it fits exactly over the locating lugs. Finally, re-insert the plastic insert and blade fully into the handle.

## Metal Detectability

---

The Handy safety knife is moulded from stainless steel and an electromagnetically detectable plastic compound. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

Orientation is a highly influential factor for the metal detectability of a contaminant that is non spherical, i.e. it will be easier to detect the contaminant when passing in one orientation compared to another - this is known as the orientation effect.

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable.
