

INSTRUCTION GUIDELINES

The ReAkta Knife is a utility knife with a novel new safety feature. Whereas an enclosed blade 'Safety Knife' almost eliminates the risk of an accident, the ReAkta Knife will give a risk reduction compared to a 'fixed blade' or 'manual retract' knife. Moulded in a Metal Detectable plastic with Metal Detectable security key for a controlled blade change. Complete with Stainless Steel blade and components.

COLOURS AVAILABLE 

ReAkta shown is heavy duty version

IMPORTANT: Please read these guidelines before you begin to use your ReAkta Knife. The Knife is supplied with the blade locked in. See blade change step 1 below.

KEY FEATURES

- Blade stays in the 'out' position whilst a controlled cut is being made, if the knife is jerked, shaken or dropped the blade will retract
 - The blade can be locked in the knife for safe storage (**NOTE: The blade will retract if you push the lock button up when the blade is out. It will not lock the blade in the out position!**)
 - Moulded in tough glass filled nylon
 - Easy blade change and cleaning procedure
 - Standard (Metal Detectable plastic blade carrier) and Heavy Duty (aluminium blade carrier) options available
 - Auto-retract version available
 - Straight, rounded, hook, super hook, convex and concave blades available
- IMPORTANT: Not all blades are interchangeable between ReAkta knives. If purchasing a different blade to the blade that is currently in your ReAkta knife, please contact us first.**

BLADE CHANGE

STEP 1

Ensure the switch is in the 'unlock' position

STEP 2

Turn the locking button a quarter turn to the left, the button will then pop up but will not lift out of the knife body

STEP 3

Slide top half of the knife body back

STEP 4

Reverse or replace the blades. Ensure switch is in the lock position when knife is not in use
