

Stainless Steel Handle | MDXSSH

Stainless Steel Handle

This 304 stainless steel handle has a blue hanging grip and is moulded from metal detectable and x-ray visible plastic. While this stainless steel handle is heavier than standard ones, they are also much stronger. Stainless steel handles are typically used

in highly corrosive environments, where there is a requirement for their strength, where the handle is likely to come into direct contact with food, or where an aluminium or plastic pole is likely to be scraped on stainless steel edges.

Stainless Steel Handle Advantages

- ✓ Detectable by conventional metal and x-ray inspection systems
- ✓ FDA, EU and FEIBP (European Brushware Federation) approved
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

Product and Packaging Information

Product Code	MDXSSH	AntiBacterial	No
Pack Size	1	Detectability	Metal & X-Ray Visible
Pack Weight	0.59kg	Handle Material	Detectable Polypropylene
Colour	Blue	Pole Material	Stainless Steel 304
Temperature Range	-18°C to +79°C	Country Of Origin	Britain
Dimensions	L 1348 x W 30 x H 30mm	Commodity Code	76042910

Safety Certificates / Approvals

FDA Approved	BRCGS Compliant	ISO 9001:2015
EU Compliant	Made In Britain	

Chemical Resistance

Concerning chemical capability of the plastics used in this product, it is confirmed that the product resists all approved detergents and sanitisers used, according to the dosing recommendations.

FEIBP

These broom heads comply with the European Brush Manufacturers Professional Hygiene Brush Charter, which promotes high quality professional brushware, and they comply with all existing Hygiene Regulations.

Compliance

This product complies with the requirements of the European Commission Regulation 1935/2004/EC (Framework Regulation). Regulation 2002/72/EC. Regulation 2023/2006 and Regulation 10/2011/EC and subsequent amendments and updates.

(Under Regulation 10/2011/EC Materials intended to come into contact with foodstuffs are not allowed to transfer toxic substances via migration when in contact with food. This product has been specifically designed for the food industry, and is 100% compliant with this requirement. It has been tested by a certified laboratory, furnishing documentation that this product complies with the migration limits laid down by EU legislation, set up under regulation 10/2001/EC).

Metal Detectability

The detectability of these products have been independently tested using calibrated machinery and is not effected by time, moisture, cleaning or abrasion. BST recommend that all our products be thoroughly tested on your metal detection systems by trained and certified professionals. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product. Such professionals should be available by contacting the manufacturer of your metal detection system. Detectability performance will vary based on, but not limited to the following factors:

- Calibration Levels
- Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Orientation

Orientation is a highly influential factor for the metal detectability of a contaminant that is non spherical, i.e. it will be easier to detect the contaminant when passing in one orientation compared to another - this is known as the orientation effect.
