Metal Detectability

BST products manufactured from 304 grade stainless steel, as such we would recommend using 304 grade stainless steel test pieces to calibrate your equipment to detect stainless steel contaminants to your specification.

BST recommend that all our products be thoroughly tested on your metal detection system / x-ray inspection system by a trained and certified professional. Your equipment may need to be re-calibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.

The information provided in this product specification sheet is based on our experience and knowledge to date and we believe it to be true and reliable. This information is intended as a guide for your use of our products, the use of which is entirely at your own discretion and risk.
